

MFE INSTRUMENT WARRANTY

The following summary specifies the details of the MicroTesla Magnetic Field Effects (MFE) Instrument Warranty. All MicroTesla Magnetic Field Effects instruments come with a one year warranty subject to the following conditions:

1. The Warranty is valid for one calendar year starting on the date the tool is first shipped to the Customer.
2. The Warranty is for design or manufacturing defects only, it does not include repairs for damage as a result of normal handling and use.
3. The Warranty is contingent on the Customer testing and accepting the MFE instrument using the MFE Test Box. This test must be completed within 40 days from the original ship date of the tool. The failure to complete the instrument testing and provide MicroTesla with the test results voids the Warranty.
4. All Warranty (and non-warranty) repairs must be authorized by MFE prior to returning the tool using the MFE return merchandise authorization (RMA) process.
5. The Warranty does not apply to damage resulting from use of Customer or any other third-party test equipment or tests.
6. Any attempt to repair or calibrate a MicroTesla Magnetic Field Effects tool by the Customer or by any other third-party will irrevocably invalidate the Warranty. MicroTesla Magnetic Field Effects reserves the right to cease providing sales, service support, repairs or calibration on any MFE instrument that has been sent to any third-party for repair, disassembly, testing or calibration.

NOTES

1. The MicroTesla Magnetic Field Effects (MFE) Terms and Conditions apply to all orders and a copy is included with all quotes.
2. All orders will be delivered in twelve weeks or less from the date of receipt of the required 25% pre-payment.
3. All SM instruments use the Ulti-Pak mounting.
4. The MDME instrument prices DO NOT include the customer's board.
